

## Artificial Intelligence Solutions

### Transform your Mission and Operations

Law Enforcement | Justice | Defense | Intelligence | Education

#### Architect in the Integration of AI into Cyber Forensics Systems and Methods

Torres AI CI is the architect and leader in the integration of Artificial Intelligence (AI) with Cyber and Digital Forensics to advance investigative and intelligence missions. For example, we are the first incorporate AI into our Cyber Investigative and Intelligence systems and processes to identify, track and capture targets. Our AI methods and techniques include technical, behavioral and sentiment analysis to identify criminal organizations, groups and individuals to quickly advance investigation and intelligence efforts.

Torres AI CI also leads enterprises to smartly choose the right AI solutions that support their missions, then trains and guides the integration of AI solutions into their business operations. Our AI Team leads enterprises to understand the benefits and the flaws of AI technologies then develops formal programs to make certain that AI solutions are implemented *right the first time*. We utilize our Enterprise Transformation Methodology (ETM) to take enterprises from concept and strategic planning to the delivery of AI solutions through a transformational step-by-step methodological approach to ensure that the enterprises' human resources are prepared for change along the way.

Our AI Team also leads enterprises to define the roles of the Chief AI Officer, AI Directorates and AI Teams to continuously identify, test, examine and evaluate new and emerging AI solutions then to create detailed AI-related business policies, processes, procedures, and standards of performance. Our AI Team:

- ✦ Leads the enterprise to understand the benefits and limitations of AI technologies and solutions,
- ✦ Guides the enterprise to determine which AI technologies and solutions best fit its mission and business culture,
- ✦ Leads the enterprise to integrate AI technologies and solutions into its business operations including the definition of AI-related business policies, processes, procedures, and standards of performance,
- ✦ Leads in the creation of the enterprise's Chief AI Officer, AI Directorates and AI Teams, and in the definition of their missions and specific roles and responsibilities,
- ✦ Guides the enterprise to continuously identify, test, examine and evaluate new and emerging AI technologies and solutions and to create AI-related business policies, processes, procedures, and standards of performance,
- ✦ Trains the enterprise to identify, evaluate and use AI solutions and technologies regardless of business space.

A critical component of our methodological approach is to thoroughly evaluate AI solutions within test environments that replicate actual enterprise business processes. As we evaluate, we make adjustments to the AI solution, the business processes or both to achieve the desired results. We then implement the solution within a Pilot Program environment to further evaluate its value and we make any additional adjustments needed to ensure the AI gives genuine benefit and that the AI solution is a complete fit. Once proven, the AI solution is rolled out to the targeted business activities within the enterprise with continuous training, coaching, and mentoring along the way – in a step-by-step methodological approach of course. Success!

### **Torres AI CI Training – Accredited AI and Cyber Training Institute**

Torres AI CI is an accredited AI and Cyber Training Institute in multiple Artificial Intelligence and Cyber Systems, Technologies, Techniques and Methods. Upon successful completion of AI and Cyber training, our Instructors will present AI and Cyber Investigative, Intelligence and Countermeasure students with certifications registered with the Accrediting Organization.

As the author of several AI and Cyber Systems, Technologies, Techniques and Methods, Torres AI CI is the Accrediting Organization for its own AI and Cyber training courses. As such Torres AI CI will deliver training and award accreditations to Law Enforcement, Justice, Defense, Intelligence, National Security and Educational agencies and institutions to conduct their own internal training and present certifications to their own students.
