Torres AI CI

The Leader in AI for National Security

Advanced Digital Intelligence and Operational Security Services

At **Torres AICI**, we deliver mission-critical intelligence and cybersecurity services by integrating industry-leading technologies including brands such as **Maltego**, **Cellebrite**, **Magnet Forensics**, and **Nessus** into a unified operational workflow. We are the architects of this mission-oriented model that was built by these pioneers of information technology. Our strategic edge lies in the application of **Agentic AI** to optimize data fusion, streamline investigative logic, and enhance decision-making processes. Here is some background:

The Technologies we Employ:

MALTEGO

✦ **Maltego**: Graph-based link analysis for mapping entities across OSINT and structured datasets, supporting threat correlation, network mapping, and deep investigations.

Cellebrite

✦ **Cellebrite**: Industry-standard digital forensics tools for rapid extraction and analysis of data from mobile devices and cloud sources, critical for criminal and intelligence operations.

MAGNET FORENSICS

✦ **Magnet Forensics**: Evidence-centric digital investigation tools enabling reconstruction of events, uncovering hidden data, and building defensible cases in both corporate and law enforcement environments.

Nessus vulnerability scanner

✦ **Nessus**: A trusted solution for vulnerability scanning, providing proactive detection of security gaps across infrastructure in alignment with global compliance methods, techniques and tested standards.

Agentic AI as a Force Multiplier

Our operational model is augmented by **Agentic AI**, which is and advanced and proven paradigm where autonomous agents assist in:

✦ Structuring and correlating multi-source intelligence.

✦ Automating parts of the analytical cycle (triage, enrichment, alerting).

✦ Improving decision logic through pattern recognition and dynamic feedback loops.

This approach enables **faster, more accurate, and adaptive intelligence cycles**, with reduced cognitive and operational load for human teams.

Built for Security-Driven Organizations

Our Business and Technology and our parent company, Torres AES, has served democracies around the globe under classified programs for the United States and Allied and Partner Nations. Examples:

- **Government, Armed Forces and Security Forces**: Enhancing situational awareness, counterintelligence, and incident response.

- **Law Enforcement**: Supporting digital forensics, chain-of-evidence integrity, and case acceleration.

- **Private Sector**: Empowering corporate security teams with advanced tools for internal investigations, threat management, and compliance assurance.

Torres AICI does not merely deploy our methods, techniques, tools and resources, we operationalize them. By combining tactical technologies with adaptive intelligence, we help clients stay ahead of digital threats and operational complexity.

COMBATING AND DEFEATING
